

Call us today for a **LIVE FIRE DEMONSTRATION** or to have a **pilot installation completed in your facility.**

Indoor Active Shooter Detection System

FOR BUSINESSES

What if employees, owners, and business resource officers could be immediately notified when and where shots were fired inside a business?

With Guardian Indoor Shooter Detection your business can have:

- Immediate, accurate gunshot alerting.
- Zero false alerts.
- 100% detection of shots.
- Text and email alerts.
- Integration to video surveillance, mass notification, alarm systems, and access control systems.
- The only gunshot detection product that is SAFETY Act Certified, the highest level of recognition by the U.S. Department of Homeland Security

What you need to know about active shooter situations¹:

- Confined, populated areas are obvious targets.
- Events are unpredictable and evolve quickly.
- Emergency action plans specific to active shooter threats **must** be in place.
- Incidents last on average 5-7 minutes.
- One death occurs every **5-15 seconds** during the event.
- Even when officers arrive almost immediately, it can be more than an hour before the suspect is apprehended or confirmed dead.

Shooter Detection Systems (SDS) and Extraco Technology are committed to protecting businesses and can help you implement this lifesaving technology.
